

ISED – Required Notices to the User (RSP-100)

Applicants for radio equipment listings understand that radio/broadcast products shall comply with the requirements to include required notices and/or statements to the user of the product for each unit of the product offered for sale.

User notices, which are required for radio/broadcast products as per the applicable RSS or BETS, shall be included with each unit of the product offered for sale.

The required notices comply with the following:

- The notices shall be as specified in the applicable RSS regulation(s) to the product.
- These notices shall be shown in a conspicuous location in the user manual for the product, or to be displayed on the product — variable formats are acceptable for providing the notices (i.e. in paper form, CD, DVD, or insert with download link on the company's website).
- If more than one notice is required for multiple product versions, the product version to which each notice pertains should be identified.
- The suppliers of radio equipment shall provide the notices and/or statements in both English and French.
- In cases where the user notifications are only available in one language (English or French) at the time of the certification process, this declaration in writing declares that the user notices and/or statements to the user of the product will be in both English and French when the product is for sale and/or lease in Canada.
